Rule-3.

### Explanatory Note

- A All such 'dangerous processes or operations' as specified and declared in the Rules framed under section 87 of the Factories Act, 1948, should be checked. If the factory or even a part of the factory submitting returns falls under this Section, the fact should be mentioned against this item and request information furnished accordingly.
- B The average number of workers employed daily should be calculated by dividing the figures of Mandays worked by number of days worked in the year. For seasonal factories\*, the average number of workers employed daily during the working season and off-season should be given separately. (Refer note B-2).
- C All such 'hazardous processes' in relation to the industries specified in the First Schedule to the Factories Act and defined under Section 2(cb) of the Act should be checked. If a factory or even a part of the factory submitting returns falls under this Section, the fact should be mentioned against this item and requisite information furnished accordingly.
- D Mandays worked should be the aggregate number of attendance of all the workers, covered under the Act, in all the working days. In reckoning attendance, attendance by the temporary as well as permanent employed should be counted and all employees should be included, whether they are employed directly or under contractors (Apprentices, who are not covered under the Apprentices Act, 1961, are also to be included). Attendance on separate shifts (e.g. night and day shifts) should be counted separately. Partial attendance for less than half a shift on a working day should be ignored while attendance for half a shift or more on such day should be treated as full attendance.
